MetLife

Software Engineer

March 2025 – Present

MetLife Software Engineer

- MetLife Software Engineer responsible for building and maintaining Ansible playbooks to automate infrastructure provisioning and configuration management.
- Software Engineer responsible for building and maintaining IaC (Infrastructure as Code) using APIM (Azure Policy) to enforce governance and compliance across cloud resources.
- Software Engineer responsible for building and maintaining VM (Virtual Machine) images and configurations, ensuring they are secure and compliant with BAU (Business As Usual) requirements.
- CTO (Chief Technology Officer) responsible for E2E (End-to-End) development and deployment of React + Go + Azure ML (Machine Learning) applications.
- Ping Identity PingAccess (Access Management) and Terraform (Infrastructure as Code) to manage 1000+ cloud resources and SSO (Single Sign-On) integration with IaC (Infrastructure as Code).
- Software Engineer responsible for building and maintaining AI (Artificial Intelligence) models and applications, ensuring they are secure and compliant with BAU (Business As Usual) requirements.

Software Engineer

September 2021 – February 2025

MetLife Software Engineer

- Software Engineer responsible for building and maintaining Chef cookbooks to manage 2,500+ VM (Virtual Machine) instances.
- Terraform (Infrastructure as Code) and Splunk (Log Management) to manage and monitor cloud resources and infrastructure.
- Software Engineer responsible for building and maintaining VM (Virtual Machine) images and configurations, ensuring they are secure and compliant with BAU (Business As Usual) requirements.
- Packer (Image Building) and Terraform (Infrastructure as Code) to build and manage Chef (Configuration Management) VM (Virtual Machine) images.
