

Allen Ng

Lead Software Engineer

▸ lukexng@gmail.com ▸ Tokyo ▸ LinkedIn ▸ Github

Fullstack software engineer with expertise in frontend, backend, infrastructure, CI/CD, machine learning, deep learning, and mobile development. Currently leading a team while actively exploring advancements in deep learning technologies.

Experience

MetLife

Lead Infrastructure Automation Engineer (Manager) March 2025 – Present

MetLife is an international insurance company.

- Introduced Ansible to MetLife Japan in alignment with MetLife Global strategy, transforming and automating many legacy workflows with measurable cost reduction.
- Structured workflows and enforced full IaC across multiple areas, establishing an enterprise-level approach to managing the APIM catalog, reverse proxies, and more.
- Built an in-house VM patching solution from 0 to 1 covering the full lifecycle of backup, patching, and rollback on failure, reducing the headcount needed for BAU operations.
- Worked closely with the CTO to introduce a self-service, end-to-end in-house infrastructure platform (React + Go + Azure ML), enabling users to manage their own infrastructure across multiple components.
- Developed an in-house Ping Identity PingAccess Terraform provider, enabling IaC management of complex SSO structures across 1000+ in-house applications.
- Acted as an in-house consultant introducing AI to infrastructure members, conducting workshops that deep dive into daily usage with real tasks.

Senior Infrastructure Automation Engineer September 2021 –
(Assistant Manager) February 2025

MetLife is an international insurance company.

- Introduced Chef as the configuration management tool and rolled it out to ~2,500 VM / physical servers across the entire organization.
- Migrated legacy monitoring, reporting, and deployment practices to current industry standards using Terraform, Splunk, and Chef.
- Developed multiple solutions using various technologies to eliminate manual operations.
- Fully automated and enabled self-service VM provisioning: template creation with Packer, resource creation with Terraform, and configuration management with Chef.

Zeals

Head of microservices

January 2021 – August 2021

Zeals is industry leader of chatbot commerce in Japan

- Led a diverse team of 10 engineers (Japanese and non-Japanese speakers), bridging communication gaps and managing cross-functional collaboration.
- Designed high-level system architecture and technical roadmaps for microservices infrastructure.
- Partnered with CTO to translate business requirements into technical strategies and deliverable engineering goals.
- Hands-on development of microservices: protobuf schema design, gRPC service implementation in Golang.
- Managed infrastructure automation: Kubernetes, Pulumi, CircleCI, ArgoCD, ensuring scalable and maintainable IaaS.
- Conducted technical interviews for Golang and SRE positions, screening 50+ candidates.
- Championed test automation: unit tests, cross-service E2E tests, and headless browser testing for user behavior simulation.

Software Engineer

April 2020 – December 2020

Zeals is industry leader of chatbot commerce in Japan

- Managed daily infrastructure requirements while continuously improving CI/CD, monitoring, ML pipelines, and development workflows.
- Contributed to microservices development in Golang, independently building a complete microservice from scratch.
- Conducted technical interviews for international SRE and Golang engineer candidates.
- Joined as an initial team member for new product development.

PICKUPP

Lead Software Engineer

September 2019 – March 2020

Pickupp is a cloud sourced delivery platform startup. Operating in HK, SG, MY, VN.

- Led operations product team, focusing on performance optimization, workflow improvements, and delivery matching algorithms.
- Gathered business requirements and delivered full-stack features (backend + frontend).
- Maintained and evolved the entire application stack.
- Designed and implemented data solutions using AWS (S3, Glue, Redshift, Firehose, PySpark).
- Led development of a React Native mobile application.
- Developed custom geocoding algorithms using address segmentation and tagging for complex multilingual addresses.
- Trained deep learning models for image classification tasks.

Software Engineer

March 2019 – August 2019

Junior Software Engineer

March 2018 – January 2019

ABC COOKING STUDIO HONG KONG LTD.

IT System Developer

July 2017 – February 2018

ABC Cooking Studio is an international chain cooking studio brand, operating in Japan, Korea, Taiwan, China, Hong Kong, and more.

- Maintaining entire company's system, create kubernetes cluster to improve Devops
- Refactor old web applications from PHP to nodejs
- Technologies: JavaScript/Oracle DB/PHP/AWS/Node.js/Typescript
- Frameworks: JQuery/Nativescript/React.js/Vue.js/AdonisJS/Laravel/CodeIgniter

PESELY PACKING LTD.

Part-time Web Developer

December 2014 – August 2015

Pesely is a traditional packing materials company transitioning to e-commerce.

- Deployed Magento e-commerce platform.
- Developed internal backend system with Magento integration for product management.
- Provided strategic guidance for online business expansion.

Skills

Frontend Development

HTML CSS Javascript React
Vue React Native Flutter

Backend Development

Node.js goLang PHP Python
ORM gRPC Protobuf

Infrastructure

AWS GCP Firebase Kubernetes
Relational / Documents DB Redis
MQ Distributed DB Chef
Terraform Pulumi Ansible
Datadog Splunk

CI/CD

CircleCI Jenkins
Bitbucket pipeline Github Actions
ArgoCD Azure Pipelines

AI

Pytorch tensorflow LLM
Prompt Engineering Agno

Education

Computing (Enterprise Information System)

THE HONG KONG POLYTECHNIC UNIVERSITY
2013 – 2017

Languages

Cantonese – Native speaker

English – Fluent

Mandarin – Fluent

Japanese – Fluent
